

2022 Explanation of Midwifery Services Fees

Please read this fee list and ask any/all questions about fees at the start of care. It is our sincere desire to focus our time caring for your pregnancy, birth and postpartum needs. Therefore, it is our policy to not negotiate discounts nor to discuss concerns about pricing after contracts are enacted. In the event of a termination of contract, all appointments will be billed at the base fee of \$200/appointment. The retaining fee is non-refundable. We provide billing through Quickbooks and add fees accrued to one invoice throughout your time in care. This makes record-keeping easiest for us and accessible for you online or by print/mail.
